SEPARATE DAYS GIVEN FOR
ENTRANCE AT ORLAND SCHOOL

The new school year at Orland Park (both the public grade school and the high school) will open on Tuesday, September 6, according to Mr. Virgil Henry, the new superintendent of schools.

On Tuesday and Wednesday of the first week only freshmen are expected to be present in the high school, but all grade school children should be present. On these first two days school will be dismissed at noon. The purposes of this arrangement are to help the freshmen to become acquainted with high school procedures and to allow the teachers more time to plan together for the new school year. On Thursday, September 8, all students in both the grades and the high school should be present. School will be in session all day on Thursday and every school day thereafter.

Final planning of the high school bus routes has not been completed, but it is expected that the routes will be approximately the same as last year. Later announcements on this subject will be made by the school superintendent.

High school students who have not yet registered should go to the school office to register as soon as possible. Failure of some students to register within the next few days may mean that textbooks will not be available for all when classes start. Parents and friends of students who have dropped out of high school without graduation during the past two or three years are asked to urge these students to see the superintendent about re-entering school.

Lincoln Estates Girl
Is Moved to Chicago
Hospital for Treatm't

Miss Ruth Schaper of Lincoln Estates, who was severely burned in an explosion which took place in her home July first, and who has been a patient in Silver Cross hospital since, was moved to Passavant hospital in Chicago, August 19. She was taken to the Chicago hospital, so that she could have the benefit of physiotherapy treatments for her arms and legs.

The ambulance which took her to Chicago went by way of Lincoln Estates and stopped at her home on Woodvale avenue for half an hour so that she could see her dog Tibby. The latter was so glad to see her he would not leave until he was carried away. Many of Ruth's friends took advantage of this opportunity and came to the ambulance to see her.

Mrs. Norman Bradley and her father accompanied her on the trip to Chicago.

ANIMAL OF
MYSTERY STILL
AT LARGE

The mysterious animal which has kept Homer and vicinity seething with excitement for over two weeks is still at large so far as is known at this writing. During this time three valuable cows have been badly injured by the clawing paws of a huge animal in Christ Koehler's pasture.

Hunters have guessed that the large unfamiliar tracks, found around ponds and in dust in the Hadley woods, are everything from a timber-wolf to a mountain lion. One person has suggested that it might be an escaped pet bear.

Night watchers report weird howls from various localities in the woods. A man driving on Parker road saw an unfamiliar grayish animal scurrying through the bushes. Mrs. Leonard Townsend caught a glimpse of the supposed marauder among the trees near her home.

Whatever it is, it was cunning enough to escape some 150 sportsmen who surrounded and beat out the infested territory step by step throughout Sunday. Men came from New Lenox, Lockport and other nearby places. Even reporters and newspaper photographers were on the job. Could it have been camera shy?

There has been quite a bit of conjecturing by people in the area of Mokena and Tinley Park by recalling the time, about three years ago, when a bear cub escaped from one of the men at the WLS transmitter on route 45. Some have thought that perhaps this is the same animal.

When a reporter for this newspaper called the Transmitter Tuesday afternoon, Mr. Homer Courchene, operator there, said that the bear cub which did escape three years ago, was found within two weeks from the time it escaped. It had traveled some little distance as it was found two miles west and two miles south of Orland Park and was shot, so it is not the little bear of WLS.

DRIVER'S LICENSE
RATES INCREASED

Illinois applicants for a new driver's license were cautioned by Secretary of State Edward J. Barrett today that a new law, passed by the recent General Assembly, calls for payment of a dollar fee instead of fifty cents. The law became effective immediately on its being signed by Gov. Adlai E. Stevenson today.

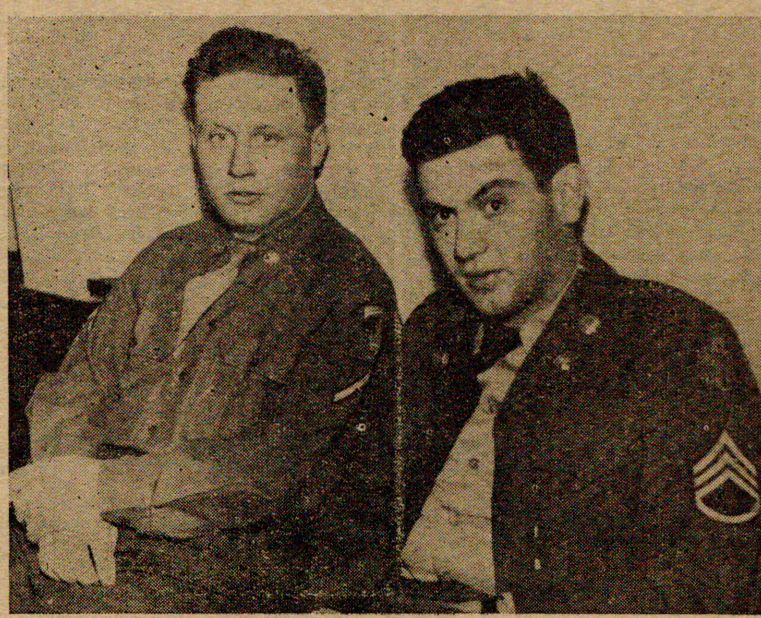

There is no change in the three-year period for which a driver's license is issued, the Secretary said. The Secretary's office licenses about 3,500,000 drivers over a three-year period. Receipts from the driver's license fee go into the road fund in the state treasurer's office for maintenance of the state highway system.

New Lenox Lions
Held "Light" Festival
Fri. and Sat. Nights

The "Stop Light" Festival sponsored by the New Lenox Lions club on the school grounds last Friday and Saturday nights was a most successful affair.

Roy Pfeifer was general chairman of planning the affair, with Charles Carnahan in charge of the publicity, and Dean Bright of the refreshments.

The success of the auction sale was due to the efforts of Fred Francis and Stephen Sergeant. Members of the Lions club appreciate the interest and co-operation shown by the town folks, in their effort to obtain the stop lights. The spirit of the community thus shown is commendable, and many people who did not donate goods for the auction sent in cash contributions.

The stop and flasher lights to be installed are estimated to cost somewhere around \$600.00 and the amount cleared on the entire festival will amount to better than \$1,000.00. However final reports are not in yet.

The lights will be installed before school starts, but no definite time has been set.

During the auction an automatic washer was awarded to C. L. Jones, the New Lenox agent at the Rock Island depot; a toaster was given to Leslie Brownlee and Miss Grace Hufker of Chicago was given a mix master.

Homer Town Hall
Filled With Objectors
At Permit Hearing

August Stanislaw Szlauderbach who has had a trailer camp on the northwest corner of Homer township adjacent to the Paul Gerches land for many months, was one of those who were the subject of a hearing before the Will county zoning board last week.

Mr. Szlauderbach, who said he had 14 or 15 trailers on his camp, wanted to build it up so as to accommodate 30 trailers. This camp was established without any permit and Mr. Szlauderbach said he was not aware that rezoning was necessary when he opened his camp.

Another petitioner, Ernest E. Basham, told the zoning board members that he planned to spend \$50,000 for the erection of a gasoline station, delicatessen, motel and trailer camp, with all sanitation and water supplies, subject to the approval of county and state health inspection and rules.

The town hall in Homer was filled to overflowing when the hearing was held there with objectors, and it is understood that Mr. Basham then withdrew his petition.

The zoning board ruled against the permits because there were too many property owners objectors, because of the present bad health facilities and because of the critical school problem which it creates.

The parents living in these trailers work at the Argonne National Laboratories and their children are in the school district area, which because of the many children from the trailer camp, and in order to allow all the children to attend school, have had to go on half day schedules. This over-burden the school so that they are unable to take care of the children sufficiently.

Why Not Retire at Birth?

By Dr. Alfred P. Haake

(EDITOR'S NOTE: Alfred P. Haake, Ph. D., Mayor of Park Ridge, Ill., is a noted Economist, Business Consultant, Lecturer and Author.)

Sometimes error is more effectively exposed through ridicule than through straight attack. That may be why someone sent me a copy of a new plan for social security. I do not know who wrote it, but I want to give it to you and then comment briefly on its significance. Here is the plan:

"RETIRE AT BIRTH" PLAN

"Every new-born child in the United States would receive from the Government a promissory note for \$20,000 at 3% interest, payable in 20 years. The 3 percent, or \$50, monthly, would go to the child's parents until the child was 20. Each year during these twenty the Government would pay \$1,000 into a sinking fund for the retirement of the note, and when the child reached the age of twenty the Government would give him or her the \$20,000 it had paid into the sinking fund.

"Boys and girls of 20 who elected to marry would thus have a capital of \$40,000, and work would be forever unnecessary if they would undertake to have at least four children, because they would receive \$50 a month for each child until it reached the age of 20, and there would be enough left of their own \$40,000 after that to care for them in their old age.

"The authors of the Retire at Birth Plan (RABP) urge these advantages over the OARP (Old Age Retirement Plan) (Townsend); people of all ages would be for it; nobody would ever have to work again; it would cost only \$1,600 (\$600 interest plus 1,000 for retirement) per person instead of \$2,400 annually, the cost of the Townsend plan; and it would automatically end the agitation for birth control."

Let me supplement the plan by suggesting that the parents, in addition to the \$50 from each child, or \$200 a month for four children, could invest their \$40,000 in government bonds at 3% and have an additional income of \$100, or a total of \$300 a month.

Then they could leave the \$40,000 to be divided among their children after they died, and each of their children would start off with a capital of \$30,000 instead of \$20,000, and each married couple could have \$60,000 instead of a mere \$40,000. And so on.

Now, how does THAT strike you as a plan? Isn't that even better than mere socialization and reduced work per hour as being tried out by England and advocated by liberals in the United States? If it is true, as must be assumed by the various "reduce work and increase pay" planners, that we can have more while doing less, so long as the Government underwrites it—why not go the whole hog and adopt the "Retire at Birth Plan?"

Perhaps it does not occur to the Government financed retirement planners that it would not do the beneficiaries of any of the plans a particle of good to have all the money in the world without having to work for it, if there were no goods to buy with the money.

Perhaps they have not asked where the money would come from to pay the interest and retirement funds, and they would be shocked to be told that each child, in the end, would have to pay the government more than \$1,000 for each \$1,000 it received from the Government.

Somebody would still have to do the work necessary to provide the food, clothing and shelter for the lucky retirement people, and perhaps we would all stop living if we stopped working.

But that is a mere detail and not serious in the eyes of the planners, so long as people are foolish enough to vote for the pied pipers who offer retirement without work, and promise to furnish you a home for your neighbor to pay for.

(** There would not be any doctors, but rabbits don't have doctors either.)

True and satisfying freedom does not mean that "You are free to do as you like," but that "You are free to do as you ought."

If They're Wild,
They Belong To Tik!

Saw Tik Anderson last week and was reminded of the first time I ever spoke to him. The missus had sent me out one Saturday afternoon to hunt for some blackberries.

I took a long hike and couldn't find any. Finally, I came to Tik's house along that low stretch east of the fork on River Road. "Hi there," I says, "any blackberries around here?"

Tik says, "There used to be—but I don't know much about things that grow wild." Later, I found how Tik supports his family by picking berries. Ever since, I've

been like the rest of folks in town—respectful of his right not to tell where "his" berries grow.

From where I sit, respecting other folks' rights comes natural in our town... in America for that matter! Whether it's a person's right to enjoy a temperate glass of beer or ale, or whether it's Tik Anderson's right to keep secret where his berries are, it's all a big part of a real democracy!

TROUBLE IN MUNICH—In this ominous scene of postwar German unrest, Jewish DPs are marching on the office of a German paper which had printed an anti-Semitic letter. The rioters have just finished painting the hated swastika on a police car as 1100 Jews and German police fought. Five Jews and 20 police received injuries. ACCIDENT WARNING

Here's a word of warning to all Moms and Dads: Accidents are the greatest kid-killers in America!

According to the 1949 edition of the National Safety Council's statistical yearbook, "Accident Facts," accidents far outrank any of the more generally feared childhood diseases as a cause of death among children 1 to 14 years old.

There were 10,731 accidental deaths in that age group in 1947—three times more than were claimed by pneumonia, the next most important cause of death. And accidents caused 42 times as many deaths as poils.

TRUSS-FRAME CONSTRUCTION

---the Soundest Design
a Plow Ever Had!

It's the design of a plow that makes the big difference in field dependability. It's the design that makes John Deere today's plow leader.

Thanks to the exclusive Truss-Frame construction, the John Deere is rigidly bound together as a solid unit with plenty of strength and toughness for the most difficult plowing jobs. Shocks of hard work are absorbed by the entire plow—not by a single bottom standard or frame member alone.

There's plenty of clearance for fast, deep plowing... for working in trashy field conditions. Servicing, too, is simple, economical. And when you add genuine John Deere plow bottoms, which assure light draft, excellent pulverizing and good scouring, it's then you'll agree—a John Deere Truss-Frame Plow is everything you want—everything you need. See us for complete details the next time you're in town.
